SENSITIVITY:	
FREQUENCY RESPONSE:	20-100 Hz. Cut to 120 Hz.
SIZE:	156 x 156 mm.
WEIGHT:	1,55 Kg.

This "very special" subwoofer is designed to fit into the cinema seats. One unit for each seat, or some of them, produces a vibration that enhances the feeling from the subwoofer channel. Connected to the subwoofer output of the Cinema Processor, it only needs a preamplifier and amplifiers depending of the number of units. The serial/parallel connection must be made carefully.
